OBJECTIVE

as a programmer with experience in software engineering, I am seeking a position within your company as a software developer that will utilize my expertise in developing web and mobile applications, which will allow me to use my problem-solving skills in creating solutions that make a difference within your company and your clients.

SUMMARY OF QUALIFICATIONS

- Innovative software engineer offering experience in the full software development lifecycle
- Implemented various projects using web-application frameworks like Laravel, Vue, Tailwind, Symfony, Shopify, Wordpress, Wordpress Plugin Modification, Hook, API Handling, ReactJS, Node JS
- Experience in mobile development using React Native
- Strong knowledge of Object Oriented (O.O.P) programming techniques
- Experience with relational database design and administration, such as MySQL and MSSQL, Mongo DB, Firebase, Firestore.
- Proficient in Frontend Web Development technologies like HTML, CSS and JavaScript, JQuery, Ajax
- Practiced design thinking skills to solve problems
- Excellent communication and presentation skills
- Able to create and present key requirements without direct supervision, has initiative and selfmotivation to work independently on projects

KEY TECHNICAL SKILLS

- PHP Framework: Laravel, Symfony
- JS Framework: Vue, React, React Native, JQuery
- Database: Mongo DB, Mysql, Phpmyadmin, Firebase
- Environment: Docker, Vagrant
- Deployment: AWS, Cloudways, Heroku
- CMS: Wordpress, Shopify, Prestashop, Webflow, Sanity
- Vanilla: HTML, CSS, Javascript
- Design Tool: Figma, Adobe XD, Photoshop
- Version control: Github, Gitlab, Phabricator

FULLSTACK DEVELOPER
LINK365 GLOBAL SOLUTIONS INC.
SEPTEMBER 2021 ~ 2023

- Proactively assisting the Team Leader in all software development for the Company including but not limited to making code reviews for other developers, deploying websites to the test pages and supporting with new project estimations.
- Designing and implementing new features and functionalities such as building responsive web application templates from scratch; configure and extending the functionality of web application.
- Establishing and guiding the website's architecture by taking care and maintaining the code quality.
- Ensuring high-performance and availability and managing all technical aspect of the web application.
- Helping formulate an effective and responsive design and turning it into a working web application.
- Ensuring that all timescales for software development are met.
- Working with API integrations between web application 3rd party services.
- Contribute to the software development strategy when called upon.
- Working with the rest Software Developers to develop an ongoing training and development plan.
- Conduct software development following Agile methodologies or other best practices.
- Ensuring that the company intellectual property and its ancillary rights are safeguarded and protected.

SOFTWARE ENGINEER
SPROBE INC.
SEPTEMBER 2019 ~ 2021

- Responsible for Programming related tasks such as coding, testing, and implementation using HTML, CSS, Javascript, Hooks (Web), Wordpress (Web CMS), React JS (Web), React Native (Mobile)
- Expertise in developing web pages using HTML5, CSS3, MVC, SASS, JavaScript, ES6, JSON, XML.
- Provided user requirements analysis, design, and programming support for enhancement of an internal Web application accessed by thousands of users within the organization
- Practiced Agile Methodologies and DevOps within the Scrum team, participating in the planning, estimation, and scheduling of tasks
- Created automation scripts for testing User Interfaces using Selenium and has knowledge of testing practices
- Created and maintained relational databases using MySQL databases and MongoDB
- Good understanding of Document Object Model (DOM) and DOM Functions.
- Cross-functional roles as developer and tester
- Used, created and maintained API services using RESTful architecture, also has experience in working with Axios queries
- Used, phabricator and github as version control
- Dockerize components to optimize the project
- Able to deploy applications using AWS, GoDaddy or Hostgator as an environment manager
- Able to deploy a React web application to Firebase hosting

WEB DEVELOPER PROWEAVER
JULY 2017 ~ 2019

- Able to test the site using different devices
- Maintain and modify based on client specification
- Able to convert a website with or without page builder or from scratch
- Used API handling to connect application
- Used problem solving achieve client needs
- Deploy it different kind of hosting like AWS, GoDaddy, and Hostgator
- Version control to maintain the code and able to review codes for multiple developers

WEB DEVELOPER

UNIVERSITY OF SAN JOSE – RECOLETOS, CEBU CITY, PHILIPPINES

2016

- Full stack web developer responsible for the development of the University Website built using PHP and WordPress.
- Prototyped and created the websites assets using the Adobe Creative Suite of tools like Adobe Photoshop, Illustrator, Premiere, and After Effects
- Implemented User Experience design principles in designing the modernized university website
- Coded WordPress plugins for custom features in the site
- Created APIs with REST
- Implemented Search Engine Optimization

SKILLS:

- Current knowledge/ability to develop Laravel, Vue, Symfony, Tailwind, Java; JSP; Javascript; HTML, CSS, Wordpress and SQL
- Strong attention to detail
- 3+ years of Application Development experience: Java / J2EE knowledge (MDB, EJB)
- Ability to work independently and manage one's time
- Should be hands-on and have ability to do coding and operate independently
- Proficient in the language, core libraries and design patterns
- Highly organized
- Strong experience of Software Development Lifecycle processes

Mobile Application Development Experience

- Responsible for Programming related tasks such as coding, testing, and implementation using React Native (Mobile)
- Experience on design and development of various components such as maps, image picker, date picker, push notifications, authentication features, profile management and navigation using reactnative.
- Solid understanding and usage of react states and props
- Building reusable components for future use.
- Created and maintained non-relational databases using MongoDB and Firebase
- Used, created, and maintained API services using REST architecture which are implemented through node.js and Firebase Cloud functions
- Experience in designing visually appealing User Interface components and elements using React Native
- Able to create and deploy node.js REST endpoints to Firebase functions

SPECIALIZATIONS:

- Laravel, Symfony, Shopify, Tailwind, Vagrant, Java, Java MVC, Java Desktop, Java Spring, Java EE, HTML, CSS, Bootstrap, Ajax, JQuery, REST Api, Wordpress, Adobe XD, AWS, Docker, React, Mongo, React Native, API, Node, Firebase, and Firestore

ACHIEVEMENTS:

Top 50 Projects Accenture Program the Future 2017 Manila, Philippines

Accenture - National Competition 2017

- Created and pitched a virtual assistant builder web application that is easy to use for small-medium businesses using Artificial Intelligence and Machine Learning techniques
- Lead developer for this project which we named “Gideon AI”. Responsible for more than 60% of the codebase. Designed architecture of key components
- Led a team of three in the conceptual planning, analysis, design, development, testing and integration of the application to various messaging apps like Messenger and Slack
- Web application was developed using the Java and Python backends

Top 10 Projects Accenture Program the Future 2016 Manila, Philippines

Accenture - National Competition 2016

- Created and pitched a mobile application for tourists to find and book local tour guides
- Responsible for prototyping and implementing the design using UI and UX principles
- This mobile application was developed using the Java Android
- Project entry was also awarded with the “People’s Choice” award

EDUCATION:

- Bachelor’s degree in Information Technology, University of Cebu (Cebu, PH)

CERTIFICATION:

PHIL-IT GCE Certified

Philippine Information Technology General Certification Examine

SKILLUPS ATTENDED

- Machine learning
- Data Science
- Pytorch
- Kubernetes
- Docker
- Storybook
- Computer vision
