WORK EXPERIENCE

Junior Front-End Dev (React)

Xurpas Inc, a global company that provides software services across various industries. Was incorporated on November 26, 2001 as a technology company specializing in the creation and development of digital products and services for mobile end-users, as well as the creation, development and management of proprietary platforms for mobile operators.

- Collaborated to the backend-devs and consumes API for the internal projects of the company
- Converted Figma layouts into reusable codes
- Learned the common practice of coding principles and design pattern since many of our seniors are very hands on.
- Ultimately I learned how agile works which help me boost and be eloquent in speaking

SUMMARY

Accomplished Bachelor of Science in Information Technology with expertise in different tools and technologies when it comes to web development particularly front-end development. I highly recommend myself in developing SPA.

That was 2016, when I started my journey as an IT Student at STI College-Munoz to pursue Bachelor's Degree.

The following year 2018 - 2020, I started to learn coding by myself. Applied for an Online Courses. Ventured to JavaScript World and specialized React.js framework as my main stack.

From then on I spent my leeway learning from an open source tutorials on the internet
