Melbourne, VIC | angelwyy1021@gmail.com | 0423 029 678 | [linkedin.com/in/angelwongyuenying](https://www.linkedin.com/in/angelwongyuenying) | angelwyy.com/

Summary

Recently completed a Master's in Information Technology with a major in Human-Computer Interaction at the University of Melbourne. Proficient in creating user-centric designs and software development projects, utilizing tools such as Figma, Java, and React.js. Sample of previous work can be viewed at angelwyy.com/. International student with a Temporary Graduate Visa for 5 years (Hong Kong Citizen Path).

Experience

UX Designer Freelance (Jun 2024 – Now)

- Designed and optimized the user experience for an AI-driven Key Opinion Leader (KOL) marketing platform, creating a seamless UX flow that streamlined campaign management and improved KOL marketing efficiency.
- Developed user-centric websites for clients in the beauty and restaurant industries to promote discounted services and deals, enabling users to explore offers and book directly through the platform.
- Integrated a booking management system tailored for the restaurant campaign, providing the client with an intuitive interface to track upcoming reservations and manage customer details.
- Technologies used: Figma, User Interface, User Experience, Web Design, Mobile Design

UX Designer Intern – Kepple, Melbourne, Australia (Nov 2023 – Feb 2024)

- Redesigned the website for Loop Alumni Management, one of the company's projects to provide a more user-friendly and intuitive experience for users.
- Technologies used: Figma, User Interface, User Experience, Web Design

Software Developer Intern – RESORTer, Melbourne, Australia (Jul 2023 – Nov 2023)

- Developed and maintained a React frontend and Django backend for an online resort booking service catering to ski instructors and host platforms.
- Deployed web interfaces for a streamlined ordering and payment workflow using React and Redux.
- Implemented automated test suites for backend APIs to enhance code reliability.
- Technologies used: React, Redux, Django, PostgreSQL

Projects

WakeNow – Mobile App design

- Designed a location-based alarm mobile app to help sleepy passengers wake up just before their desired station and notify travelers when they are close to the destination.

Personal Portfolio Website

- Designed and deployed my portfolio website using Figma, HTML, CSS, JavaScript

Zinnia – Web Forum development

- Collaborated as part of a 4-person team to implement a forum application using the MERN (MongoDB, Express, React.JS, and Node.JS) stack, with a particular focus on React.JS for the project.
